PROJECT

STUDENT CAREER DEVELOPMENT   2023
ROLE : LEADER
This project is about giving all the facilities to the users specially the students and theteenagers just by making a simple login, who are looking for the guidance for their career andLooking for some help in exploring careers. Till now users had to search for all the things atdifferent platforms and that use to get more tedious work for them so keeping that thing inmind, this project comes out being an all-in-one project which allows interacting with guide,asking queries, also some eBooks are available with some sort of useful video lectures. This isdesigned in very accurate way and is totally based and built using some scripting languagesuch as HTML and CSS.
